

# DEPLOY APPLE DEVICES WITHOUT LIFTING A FINGER

You're good to go with Apple Business Manager.

Whether your business has ten devices or ten thousand, Apple Business Manager can help you deploy, and manage your Apple devices without the need for manual configuration.

Working seamlessly with your mobile device management solution, you can set up Apple devices with ease across your business, manage them over the air and distribute apps, books and software all from one place.

- ✓ Creation of managed Apple IDs with customisable privileges
- ✓ iOS supervision for managing additional settings
- ✓ Central web-based portal to manage device deployment, purchase and distribute content
- ✓ Flexible deployment of system updates
- ✓ Zero-touch configuration for all your Apple devices
- ✓ Option of mandatory and non-removable MDM enrolment
- ✓ Customised onboarding experience and streamlined setup process for employees
- ✓ Easy employee access to apps

Apple Business Manager allows you to control your devices in the way that works best for you, and it couldn't be simpler to use. The result is simpler, easier, lower touch management, saving any business time, money and effort.

Call us now on 0800 032 8274 and find out how we can help your growing organisation get started with Apple Business Manager.
