FOR IMMEDIATE RELEASE

Marlin Communications Ltd achieves ISO/IEC 27001:2022 Certification, Reinforcing Commitment to Data Security

Bath, Somerset, UK – 25/09/24 – Marlin Communications, a leading provider of business communications technology solutions, is proud to announce that it has successfully achieved ISO/IEC 27001:2022 certification.

This prestigious certification underscores our unwavering commitment to protecting our customers' sensitive information and maintaining the highest standards of data security.

ISO/IEC 27001:2022 is a globally recognised standard that establishes a comprehensive framework for information security management systems (ISMS). By achieving this certification, Marlin Communications has demonstrated its ability to effectively manage and protect its information assets, mitigating risks and ensuring the confidentiality, integrity, and availability of data.

"We are thrilled to achieve ISO/IEC 27001:2022 certification," said Martin Buckland, CEO at Marlin Communications.

"This accomplishment is a testament to our dedication to data security and our unwavering commitment to protecting our customers' information. By implementing a robust ISMS, we are able to provide our clients with the peace of mind that their data is safe and secure."

Marlin Communications is committed to ongoing compliance with ISO/IEC 27001:2022 and will continue to invest in information security measures to safeguard our customers' data.

Marlin Communications is a multi-award-winning & trusted, single-source provider of business communications & collaboration technology. For over 25 years, the company has provided innovative solutions across voice, video, connectivity, security, mobile, contact centre through close relationships with over 30 market-leading vendor-partners and a commitment to the highest levels of customer service.
